Quarterly Population Highlights

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: JULY 1, 2015 | ISSUE #15-02

B.C. HIGHLIGHTS:

The population of B.C. was estimated at 4,683,139 as of July 1, 2015, growing by 10,665 persons in the second quarter of 2015 (an increase of 0.23% from April 1, 2015). Combined net migration from all sources (interprovincial and international) produced a net gain of 8,076 during the second quarter of 2015. Net interprovincial in-migration totalled 3,974 persons. The second quarter of 2015 also saw a net gain due to net international migration (+4,102), in large part due to the number of immigrants (+9,053). Finally, a natural increase (births minus deaths) of 2,589 positively impacted population growth in the second quarter.

B.C. population April 1, 2015		**4,672,474**
Interprovincial migration		+ 3,974
Add interprovincial arrivals	+21,276	
Minus interprovincial exits	−17,302	
International migration		+ 4,102
Add immigrants	+ 9,053	
Minus total net emigrants	− 2,669	
Net change in non-permanent residents	− 2,282	
Natural change		+ 2,589
Add births	+11,187	
Minus deaths	− 8,598	
Net Change		+ 10,665
B.C. population July 1, 2015		**4,683,139**

THE LAST TWELVE MONTHS:

B.C.'s total population increase over the twelve months ending June 30, 2015 was 44,724 persons (+0.96%), largely due to international migration. On an annual basis, immigrants (+31,501) and non-permanent residents (+4,394) were the main providers of population growth for the province. Interprovincial migration accounted for a net gain of 12,413 persons from July 1, 2014 to June 30, 2015. Consequently, nearly four-fifths (+35,034) of population growth since July 1, 2014 could be attributed to net migration from all sources. The remainder was due to the natural increase (+9,690).

NATIONAL OVERVIEW:

The population of Canada grew by 96,988 persons (+0.27%) to 35,851,774 during the second quarter of 2015. Leading the growth at the provincial and territorial level were Nunavut (+1.03%) followed by Yukon (+1.00%), Alberta (+0.50%) and Manitoba (+0.30%). Ontario, Saskatchewan, British Columbia, Quebec, Prince Edward Island and Nova Scotia saw smaller population increases while the remainder of the provinces and territories reported small declines.

SECOND QUARTER INTERNATIONAL MIGRATION:

Net international in-migration to British Columbia (*immigrants plus the net change in non-permanent residents plus returning emigrants less emigrants and persons temporarily abroad*) registered a net gain in the second quarter, totalling 4,102. This is a noticeable decrease from the same quarter of 2014 when a net gain of 9,145 was reported. The total number of immigrants arriving in British Columbia from April 1 to June 30 (+9,053) was similar to the same three months in 2014 (+9,936). The net loss in non-permanent residents (–2,282) compares with a net gain (+1,859) for the same quarter in 2014. As for persons leaving B.C. for international destinations, an estimated 2,785 left on a permanent basis and 1,373 were away temporarily in the second quarter of 2015, unchanged from the same period in 2014.

SECOND QUARTER INTERPROVINCIAL MIGRATION:

British Columbia was one of five provinces and territories that reported a net gain in population from other Canadian jurisdictions in the second quarter of 2015. In B.C. an inflow of 21,276 persons was offset by an outflow of 17,302 for a net population gain of 3,974. British Columbia's net exchange with Alberta was positive, with an estimated 1,179 more persons leaving Alberta for B.C. than those going to Alberta from British Columbia. In addition, B.C. reported positive net in-migration from Ontario (+1,260), Manitoba (+479), Quebec (+476), Saskatchewan (+420) and New Brunswick (+105). B.C. also received small positive gains from Prince Edward Island, Newfoundland and Labrador, Northwest Territories, and Yukon. Alberta was the biggest net recipient in the second quarter of 2015 with a net gain of 8,264 interprovincial migrants. Nova Scotia, Nunavut and Yukon were the only other jurisdictions to post a net gain.

B.C. NET INTERPROVINCIAL MIGRATION BY QUARTER, Q1 1998 TO Q2 2015

DID YOU KNOW?

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a population centre (known as the core). A CMA must have a total population of at least 100,000 of which 50,000 or more must live in the core.

A CA must have a core population of at least 10,000. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the core, as measured by commuting flows derived from previous census place of work data.

If the population of the core of a CA declines below 10,000, the CA is retired. However, once an area becomes a CMA, it is retained as a CMA even if its total population declines below 100,000 or the population of its core falls below 50,000. Small population centres with a population count of less than 10,000 are called fringe. All areas inside the CMA or CA that are not population centres are rural areas.

When a CA has a core of at least 50,000, it is subdivided into census tracts. Census tracts are maintained for the CA even if the population of the core subsequently falls below 50,000. All CMAs are subdivided into census tracts.

BC currently has four CMAs and 21 CAs. Of the latter, 17 have no census tracts. Nationwide there are 151 CMA/CAs.
